Appendix A

EXPLANATION OF TERMS

Establishments—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the "company" or "enterprise" which may consist of one or more establishments. Census of Business figures represent a summary of reports for individual "establishments" rather than "companies." (Enterprise statistics reports, Series ES, will be issued at a later date covering the Censuses of Business, Manufactures, and Mineral industries.) A separate report was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification Manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

Services leased departments, i.e., separately owned businesses operated as departments of another service establishment or of a retail establishment (e.g., a separately owned shoeshine parlor in a barber shop or a beauty salon in a department store), are treated as separate service establishments in the 1963 census.

The "number of establishments" shown in this report is the number in business at the end of the census year.

Receipts—Receipts include the total of all receipts from customers for services rendered and merchandise sold during 1963 whether or not payment was received during 1963. Total receipts exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the establishment directly from customers and paid directly by the establishment to a local, State, or Federal tax agency. Excise taxes paid by the manufacturer or wholesaler and passed along to the service establishment are also included.

Receipts do not include receipts of manufacturers, wholesalers, retail establishments, and other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sales of merchandise to individuals or to other businesses) by establishments primarily engaged in services.

Although the count of establishments in this report represents the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year. Nonemployer establishments are included in the tables if they operated at an annual receipts volume rate of $1,000 or more; however, their reported receipts have not been projected to a full year's operation.

Payroll, entire year—Payroll includes salaries, wages, commissions, bonuses, vacation allowances, and the value of payments in kind (such as free meals, lodgings, etc.) paid during the year to all employees. Gratuities received by employees from patrons are not included. For corporations, it includes amounts paid to officers and executives; it does not include compensation of properties or of partners of unincorporated business. Payroll is reported before deductions for social security, income tax, insurance dues, etc. Payroll is not limited to "taxable" payroll as reported on IRS Form 941.

Payroll, workweek ended nearest November 15—This item consists of payroll, as defined above, paid to persons on the payroll in the pay period ended nearest November 15, 1963. Establishments with a pay period other than a week were requested to adjust the figures to a weekly basis.

Paid employees, workweek ended nearest November 15—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll for the workweek ended nearest November 15.

Active proprietors of unincorporated businesses—These data are computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors if the establishment was in business during the week of November 15.

KIND-OF-BUSINESS CLASSIFICATIONS

"Services," as defined in the 1957 edition of the SIC Manual and its supplement[1] issued in 1963, are establishments primarily engaged in rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1957 edition of the SIC Manual and its supplement issued in 1963. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

As noted in the Introduction under "Method of Enumeration," the 1963 census data are based on reports from two different sources for "employer" and "nonemployer" establishments. "Nonemployer" establishments were classified on the basis of information supplied on the 1963 Federal income tax returns. Because of the nature of the information available on the tax returns, the kind-of-business classifications for these establishments represent primarily a "self-designation" by the establishments.

"Employer" establishments, on the other hand, were canvassed by mail and required to complete report forms especially designed for this census. On this form, also, considerable use was made of "self-designation." However, for kinds of business which posed classification problems, special questions were included to determine the census classification.

This report includes data for SIC Group 721 except hand laundries (SIC Industry 7212). Descriptions of those kinds of business for which data are provided in this report follow.

Power laundries (SIC 7211)—Establishments primarily engaged in operating mechanical laundries with steam or other power. Data for collecting and distributing units (branch outlets) owned and operated by power laundries are merged with those for the laundry which owned them and are not treated as separate establishments. Independently owned agencies for laundry plants are included in the classification "Cleaning, pressing shops" (SIC 7271 part). Included as "power laundries" are establishments that use family type washers and obtain more than half of their receipts from attended service work. Excluded are establishments which have power laundry equipment but which are primarily engaged in a specialty such as industrial laundering, linen rental, or diaper service. These are presented in separate categories as shown below.

Self-service laundries (SIC 7215 part)—Establishments known as "laundromats" or "launderettes" primarily engaged in furnishing the use of laundry equipment on their own premises to the public for a fee. Establishments which install and operate coin-operated laundering machines in apartment houses are included under "Coin-operated service machine establishments" (SIC 7299 part). Establishments which rent or repair machines are included under "Coin-operated machine rental, repair services" (SIC 7394 part). Establishments whose receipts from attended service work were greater than 50 percent of total receipts are included in "Power laundries" (SIC 7211).

Industrial launderers (SIC 7213 part)—Establishments primarily engaged in supplying laundered work clothes, wiping towels, and other selected items to factories, garages, newspapers, and similar users. These work clothes, etc., may belong to the industrial launderers and be supplied on a rental basis, or they may be the customer's own goods. Such establishments may or may not operate their own power laundry facilities.

Current Business Reports

Listed below are selected Bureau of the Census publications which are based on data collected in various recurring current surveys of the Bureau. While generally they are limited to businesses within the scope of the Business Census, there are some exceptions, particularly County Business Patterns.

County Business Patterns (CBP)

Data on mid-March employment and January-March payrolls taxable under the Federal Insurance Contributions Act are published in these reports for the United States, States, counties, and standard metropolitan statistical areas. These statistics are shown for many kinds of business under the following broad industry groups: agricultural services, forestry, fisheries; mining; contract construction; manufacturing; public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services. Beginning with 1964 data, CBP data will be issued annually with the report for the first quarter 1964 scheduled for release about mid-1965. Previously published data are available for the first quarter of 1962 and selected prior years. These reports are published in 15 parts [which vary in cost from $1.50 to $4.00], 1 or more for each of the 9 geographic divisions and a United States Summary. They may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402.

Retail Trade Reports

[All reports in this series sold as a single subscription for $6.00 per year ($4.00 additional for foreign mailing) by the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. Unless otherwise indicated, individual copies are available from the Bureau of the Census, Washington, D. C. 20233.]

(a) Weekly Retail Sales: Issued each Thursday, this report presents estimated weekly sales of retail stores in the United States, by kind-of-business groups and for all kinds of business combined, for weeks of the current month to date and all weeks of the previous month. Percentage changes in sales in the most recent week, the most recent 4-week period, and comparable periods a year ago are also shown. (Single copies, 10 cents.)

(b) Advance Monthly Retail Sales: Issued about 10 days after the close of the data month, this report presents monthly estimates of sales of retail stores by kind-of-business groups and for all kinds of business combined. Data are shown for current month, preceding month, and same month a year ago, both unadjusted and adjusted for seasonal variations and trading-day differences. (Single copies, 10 cents.)

(c) Monthly Retail Trade: This report includes estimated dollar sales and end-of-month accounts receivable, by kind of business, for all retail stores and for stores of organizations operating 11 or more retail stores for the United States for the current month, with comparisons for previous months. Data are shown both unadjusted and adjusted for seasonal variation and trading-day differences. (Single copies available at 10 cents from the U.S. Government Printing Office.)

(d) Monthly Retail Trade—Area Sales Supplement: This supplement to the Monthly Retail Trade Report provides estimates of sales of retail stores by geographic regions, divisions and selected States and standard metropolitan statistical areas for the current month, with comparisons for previous months. (Single copies, 10 cents.)

(e) Retail Trade—Annual Report: This report provides annual retail sales by kind of business and per capita sales of selected kinds of business, for the United States, geographic regions, divisions, and selected States. United States figures by kind of business are given on the cost value of year-end merchandise inventories, sales-inventory ratios, and year-end accounts receivable balances, by charge and installment accounts. Separate figures also are provided for retail stores and organizations operating 11 or more retail stores and, for the food and general merchandise groups, for organizations operating 4 or more retail stores. (Single copies, 20 cents.)

Monthly Wholesale Trade Report

This report includes estimated dollar sales, end-of-month inventories, and stock-sales ratios of merchant wholesalers, by kind of business for the current month, with comparisons for previous months. Dollar volume sales estimates are shown by geographic division in total and for durable and non-durable kind-of-business subtotals. Sales and inventory trends (percent changes) are shown by detailed kinds of business at the national level and for selected categories by geographic division. Measures of sampling variability are given. United States data are shown adjusted for seasonal variations and, in the case of sales, also for trading-day differences. [This report is sold for $1.50 per year (50 cents additional for foreign mailing) by the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. Single copies available at 15 cents from the U.S. Government Printing Office.]

Other Current Business Reports

Canned Food Report: This report is issued as of five dates—January 1, April 1, June 1, July 1, and November 1—to show total stocks of wholesale distributors and canners, including warehouses of retail multiunit organizations, of selected canned food items (vegetables, fruits, juices, fish). In all reports data are shown in actual cases for total stocks and for canners' carry-over, pack, and total supply. In the January 1 report separate data are shown for the No. 10 can size, as well as for warehouse stocks of retail multiunit organizations. Data on canners are furnished by the canners' association. (This series of reports, sold at $1.00 for one season's (5) reports or 25 cents for a single copy, may be obtained from the Bureau of the Census, Washington, D.C. 20233.)

Also included are quarterly imports of green coffee during the same period. [These data, issued as a press release, available without charge from the Bureau of the Census, Washington, D. C. 20233.]

PROVISIONS OF LAW RELATING TO THE 1963 CENSUS OF BUSINESS

(From Title 13 United States Code)

SECTION 131. The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses, including the distributive trades, service establishments, and transportation (exclusive of means of transportation for which statistics are required by law to be filed with, and are compiled and published by, a designated regulatory body), in the year 1954 and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof: *Provided,* That the censuses of manufactures, of mineral industries, and of other businesses, including the distributive trades and service establishments, directed to be taken in the year 1954 relating to the year 1953 shall be taken instead in the year 1955 relating to year 1954.

SECTION 191. (a) Each of the censuses authorized by this chapter (other than censuses of population) shall include each State, the District of Columbia, Alaska, Hawaii, the Virgin Islands, Guam, and the Commonwealth of Puerto Pico, and as may be determined by the Secretary, such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Censuses of population shall include all geographic areas referred to in the preceding sentence. Inclusion of other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

(b) For censuses taken in the Virgin Islands, Guam, or any possession or area not specifically designated in (a) above, the Secretary may utilize or adopt census data collected by the Governor or highest ranking Federal official, when such data are obtained in accordance with plans prescribed or approved by the Secretary.

SECTION 224. Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, whether such request be made by registered mail, by certified mail, by telegraph, by visiting representative, or by one or more of these methods, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule prepared and submitted to him under the authority of this title, shall be fined not more than $500 or imprisoned not more than sixty days, or both; and if he willfully gives a false answer to any such question, he shall be fined not more than $10,000 or imprisoned not more than one year, or both.

SECTION 9. (a) Neither the Secretary, nor any other officer or employee of the Department of Commerce or bureau or agency thereof, may, except as provided in section 8 of this title—

(1) use the information furnished under the provisions of this title for any purpose other than the statistical purposes for which it is supplied; or

(2) make any publication whereby the data furnished by any particular establishment or individual under this title can be identified; or

(3) permit anyone other than the sworn officers and employees of the Department or bureau or agency thereof to examine the individual reports.

Appendix B

EXPLANATION OF TERMS

Establishments—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the "company" or "enterprise" which may consist of one or more establishments. Census of Business figures represent a summary of reports for individual "establishments" rather than "companies." (Enterprise statistics reports, Series ES, will be issued at a later date covering the Censuses of Business, Manufactures, and Mineral industries.) A separate report was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification Manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

Services leased departments, i.e., separately owned businesses operated as departments of another service establishment or of a retail establishment (e.g., a separately owned shoeshine parlor in a barber shop or a beauty salon in a department store), are treated as separate service establishments in the 1963 census.

The "number of establishments" shown in this report is the number in business at the end of the census year.

Receipts—Receipts include the total of all receipts from customers for services rendered and merchandise sold during 1963 whether or not payment was received during 1963. Total receipts exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the establishment directly from customers and paid directly by the establishment to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer or wholesaler and passed along to the service establishment are also included.

Receipts do not include receipts of manufacturers, wholesalers, retail establishments, and other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sales of merchandise to individuals or to other businesses) by establishments primarily engaged in services.

Although the count of establishments in this report represents the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year. Nonemployer establishments are included in the tables if they operated at an annual receipts volume rate of $1,000 or more; however, their reported receipts have not been projected to a full year's operation.

Payroll, entire year—Payroll includes salaries, wages, commissions, bonuses, vacation allowances, and the value of payments in kind (such as free meals, lodgings, etc.) paid during the year to all employees. Gratuities received by employees from patrons are not included. For corporations, it includes amounts paid to officers and executives; it does not include compensation of proprietors or of partners of unincorporated businesses. Payroll is reported before deductions for social security, income tax, insurance dues, etc. Payroll is not limited to "taxable" payroll as reported on IRS Form 941.

Payroll, workweek ended nearest November 15—This item consists of payroll, as defined above, paid to persons on the payroll in the pay period ended nearest November 15, 1963. Establishments with a pay period other than a week were requested to adjust the figures to a weekly basis.

Paid employees, workweek ended nearest November 15—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll for the workweek ended nearest November 15.

Active proprietors of unincorporated businesses—These data are computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors if the establishment was in business during the week of November 15.

"Services," as defined in the 1957 edition of the SIC Manual and its supplement[1] issued in 1963, are establishments primarily engaged in rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1957 edition of the SIC Manual and its supplement issued in 1963. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

As noted in the Introduction under "Method of Enumeration," the 1963 census data are based on reports from two different sources for "employer" and "nonemployer" establishments. "Nonemployer" establishments were classified on the basis of information supplied on the 1963 Federal income tax returns. Because of the nature of the information available on the tax returns, the kind-of-business classifications for these establishments represent primarily a "self-designation" by the establishments.

"Employer" establishments, on the other hand, were canvassed by mail and required to complete report forms especially designed for this census. On this form, also, considerable use was made of "self-designation." However, for kinds of business which posed classification problems, special questions were included to determine the census classification.

Descriptions of those kinds of business for which data are provided follow.

HOTELS, MOTELS, TOURIST COURTS, CAMPS
(SIC Major Group 70, Except 702 and 704)

Establishments engaged in providing lodging or lodging and meals to the general public except (1) rooming and boarding houses, (2) hotels which provide accommodations only for "permanent" residents, and (3) tourist homes. Apartment or residential hotels which provide accommodations for transients are included. Also included are commercial establishments which provide camping and trailer space or camping facilities on a fee basis.

Hotels, motels (SIC 7011)—There have been significant changes in the characteristics of the establishments falling within this area over the past several years, and it has become increasingly difficult to arrive at mutually exclusive definitions for hotels and motels which would be satisfactory to all concerned. In the 1963 Supplement to the 1957 edition of the Standard Industrial Classification Manual, the establishments have all been combined under one category, "Hotels, tourist courts, and motels." In this report, however, they are presented in separate categories, as follows:

Year-round hotels, with 25 or more guest rooms.
Year-round hotels, with less than 25 guest rooms.
Seasonal hotels.
Motels, tourist courts.
Motor hotels.

The classification of individual establishments into "hotels," "motor hotels," and "motels, tourist courts" was based on the respondent's self-designation.

Trailer parks (SIC 7031)—Establishments known as trailer parks primarily engaged in renting trailer space and providing utilities, such as water and electricity.

Sporting, recreational camps (SIC 7032)—Commercially operated sporting or recreational camps providing lodging or lodging and meals. These include boys' and girls' camps, fishing and hunting camps, and dude ranches. Day camps are also included. Also excluded from the Census of Business are establishments operated by membership organizations and not open to the general public.

Data for collecting and distributing units (branch outlets) owned and operated by power laundries are merged with those for the laundry which owned them and are not treated as separate establishments. Independently owned agencies for laundry plants are included in the classification "Cleaning, pressing shops" (SIC 7271 part). Included as "power laundries" are establishments that use family type washers and obtain more than half of their receipts from attended service work. Excluded are establishments which have power laundry
